

Subject: Scott River Watershed: Limited Conditional Suspension of Curtailments for Group 8 Surface Water Rights– (Addendum 10)

To: Scott River Water Right Holders (sent to water right holders for which the Board has email addresses and to the Scott-Shasta Drought E-mail List)

This addendum applies to Group 8 surface water rights and provides for conditional suspension of curtailments so long as the minimum flow requirement in the table below is met, unless amended or superseded by a subsequent addendum.

The State Water Resources Control Board (State Water Board or Board) is conditionally suspending curtailments for Group 8, the most senior surface water rights in the Scott River watershed, as listed in Attachment A of Order WR 2024-0024-DWR (Order), and as authorized under the Scott River and Shasta River Watersheds Drought Emergency Regulation ([Regulation](#)). **This Addendum to the Order allows surface water diverters in Group 8 to conditionally divert water to the extent consistent with their water rights. All other surface water rights in the Scott River watershed remain curtailed and may not divert until otherwise informed by the State Water Board. Diversions under this addendum are subject to the conditions below:**

- **Cease diversions when the instantaneous flow at the USGS Fort Jones gage approaches the minimum flow requirement (150 cfs for May).**
- **Cease diversions immediately if directed to do so by the State Water Board.**

Following the reinstatement of curtailments for all surface water rights in the Scott River watershed on May 21, 2026, flows continued to decline to low flow of 137 cfs at around 8:45 pm on May 22, 2026, and then began to increase as curtailed water reached the [Fort Jones United States Geological Survey \(USGS\) gage](#), increasing flows above the flow requirement. As of about 2:30 pm on May 25, 2026, the flow at the Fort Jones USGS gage is 167 cfs. While curtailment of more junior surface water rights in the Scott River watershed is needed to maintain the minimum flow requirement at the Fort Jones USGS gage, the limited, conditional suspension of curtailments is appropriate. For reference, the required minimum flows for the Scott River watershed in the coming months are the natural flow of the system up to the amounts listed in the table below, as measured in cubic feet per second (cfs), at the Fort Jones USGS gage.

May	June 1-23	June 24-30	July	August	September	October
150	125	90	50	30	33	40

The Regulation allows for limited diversions under curtailed water rights for specific purposes. More information on these exceptions can be found below.

Background

Pursuant to flow regulations that establish minimum instream flows for fishery protection, which with minor exceptions and changes have been in effect since

August 30, 2021, the State Water Board issued a curtailment order ([Order WR 2024-0024-DWR](#)) on July 23, 2024. It curtailed all surface water rights in the Scott River watershed, as specified in Attachment A of the Order. Subsequent addendums have been issued to suspend or reinstate curtailments as required to maintain minimum flow requirements established in the [Regulation](#). (The Regulation is available online at: https://www.waterboards.ca.gov/drought/scott_shasta_rivers/docs/2025/2025-scott-shasta-emergency-reg-adopted-searchable.pdf.)

Flow measurements were taken in the field on May 14, 2026, and resulted in an upward adjustment to the flow readings at the Fort Jones USGS gage. An additional flow measurement was conducted on May 20, 2026, that resulted in a downward adjustment to the flows at the USGS Fort Jones. Flows dropped below the May minimum flow requirement on May 20, 2026. Addendum 9 was issued on May 21, 2026, suspending all surface water diversions in the Scott River watershed. On May 23, 2026 flows met the minimum flow requirement for May, and continued to rise. As of May 24, 2026 at about 6:45 am, flows have remained at or above 162 cfs; as of about on May 25, 2026, at 2:30 pm the flow at the [Fort Jones USGS gage](#) was recorded at 167 cfs. Due to flows substantially increasing and remaining above the minimum requirement of natural flows up to 150 cubic feet per second for May, the State Water Board is conditionally suspending curtailments for Group 8 surface water rights.

Based on the current flow and the increasing trend and sustained flows above the minimum flow requirement in response to recent curtailments, the suspension of curtailment for the most senior surface water rights is appropriate. While flows increased with the implementation of curtailments, overall flows are anticipated to follow a downward trend at the Fort Jones USGS gage due to insignificant snowpack, water demand, seasonal drought, long-term precipitation and temperature forecasts, and a comparison to flows in recent years with similar snowpack measurements. While the lack of snowpack, seasonal forecasts, and historic flows indicate curtailment will be necessary for much of the irrigation season, the State Water Board will continue to monitor flows, flow forecasts, precipitation and temperature forecasts, and watershed conditions regularly to determine if adjustments to the curtailments are appropriate.

Allowances for Continued Limited Diversions

The Regulation has exceptions for certain types of diversions that may continue even after you receive a curtailment order, if the appropriate form(s) is submitted to the State Water Board (see more on this below). These exceptions are:

- **Non-consumptive Diversions**. This exception applies if your diversion is not consumptive, meaning that it does not use up water or change the time the water is available to others (e.g., run-of-river hydropower with returns entering the same stream, instream use).
- **Minimum Human Health and Safety Diversions**. This exception applies if a curtailed diversion is your only water source for minimum human health and safety purposes, like drinking, cooking, washing, or meeting the state's critical infrastructure needs. Please note that diversions for firefighting may continue under this exception.

- Minimum Livestock Watering Diversions. This exception applies if a curtailed diversion is your only source for minimum livestock watering. See section 875.3 in the Regulation for more information on minimum livestock watering.

Reporting, certification, and petition forms previously submitted for the Order are still active and do not need to be resubmitted, unless you are updating your previous submittal. If you want to continue diverting using one of the above exceptions, and you have not submitted information already, you must submit the relevant information to the State Water Board. Please contact us using the information in the Questions section below if you have questions about a prior submittal or need to submit a certification or petition.

Questions and How to Stay Informed

If you believe your curtailment is being suspended in error or have questions regarding this email please contact Board staff immediately using the information provided below.

Contact Board Staff by:

- Email: ScottShastaFlows@waterboards.ca.gov
- Phone: (916) 327-3113

Stay Informed by:

- Webpage: Please monitor your email and our [Scott-Shasta Drought webpage](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) for future updates.
- Email Subscription: If you received this notice in a forwarded message and would like to receive future emails related to this and similar efforts, please sign up for the State Water Board's "Scott-Shasta Drought and Flow Efforts" [email subscription list](#) under "Water Rights". Sign up for an email subscription list online at:
https://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe

If an email notice is issued on the weekend or after business hours, the website will not be updated until the following workday due to service limitations.

Juliet Christian-Smith
Deputy Director
Division of Water Rights
State Water Resources Control Board

Issued May 25, 2026

Attachment: Attachment to Addendum 10 of Order WR 2024-0024-DWR: Order Imposing Water Right Curtailment and Requiring Reporting for Surface Water Rights in the Scott River Watershed

**ATTACHMENT TO ADDENDUM 10 OF ORDER WR 2024-0024-DWR:
ORDER IMPOSING WATER RIGHT CURTAILMENT AND REQUIRING REPORTING
FOR SURFACE WATER RIGHTS IN THE SCOTT RIVER WATERSHED**

The Curtailment Group number is based on the order of priority outlined in [Regulation](#) section 875.5(a)(1). Group 1 is curtailed first and suspended last (i.e., most junior water right priority), Group 8 is curtailed last and suspended first. Please note that water rights of Group 2 refer to the Surplus Rights only, not the other water rights of the owner. Please also note that ownership is as listed in the Scott River Decree. This list should be understood to include the successors and assigns of the owners at this time. Group 2 Surplus Rights are generally unavailable in drought years and are only available when all other rights under the Scott River Decree have been fully satisfied.

NOTE: These are the same water rights and Curtailment Groups as in the original Order WR 2024-0024-DWR, issued July 23, 2024.
