State Water Resources Control Bd.

Mar 22 -13

This proposal can be described as a taking of our land. The many orchards in the two water districts would die in a year of short supply as a result of the taking of our water.

The cry today is jobs jobs jobs. The result of water shortage would result in many jobs lost. The shortage would last for four or five years if the orchards fail due to the taking of our water.

Sen. Wendy E. Wagner
