Re: Taking water away from Farm land

Message: Please do not increase water exports  
this spring along the Merced, Tuolumne, & Stanislaus  
rivers. We need that water in the reservoirs for  
the farmland. I feel you are basing this decision  
on guess work and bad science. It will be devastating  
to already hurting people. Our water infrastructure  
needs to be modernized (instead of a train to nowhere)  
if we are to protect our agriculture and all the  
people it feeds.

Thank you

*Joyce De Jong*
