

I am writing to express my concern that the Bay Delta Plan does not provide sufficient environmental protections. Flows must be increased! Species are on the brink of extinction! This is serious stuff that simply MUST not be allowed to happen. The focus should be on efficient and reasonable use of water, instead of stealing it from the easiest source.

PLEASE safeguard and provide stewardship for our natural resources in the most thoughtful and long-term manner. This easy short term solution is not serving us well.

Thank you - Maureen Hardy
