

To State Water Resources Control Board Members,

We are writing in firm opposition to the proposed flow amendments to the San Joaquin River. We feel the proposed changes will have a significant effect on people and communities in the San Joaquin Valley. Making serious changes to the river that affects the lives of so many people is questionable at best, but to make these changes when there is no evidence that shows these changes will even create the desired outcome is plain irresponsible. As leaders in this valley, your first responsibility should be the well being of the lives of the PEOPLE of this valley.

Again, we strongly urge you to oppose these proposed changes.

Best Regards,

**Ron Nydam,
John Nydam**
