

[SUMMARY OF FINAL SUBMITTED VERSION]**SUPPLEMENTAL STATEMENT OF WATER DIVERSION AND USE FOR 2014**

Primary Owner: PRINCETON-CODORA-GLENN IRRIGATION DISTRICT

Statement Number: S020961

Date Submitted: 2015-06-29

1. Water is used under	Riparian Claim Pre-1914 Claim
2. Year diversion commenced	1903

3-4. Maximum Rate of Diversion for each Month and Amount of Water Diverted and Used				
Month	Rate of diversion	Amount directly diverted (Acre-Feet)	Amount diverted or collected to storage (Acre-Feet)	Amount beneficially used (Acre-Feet)
January		0	0	0
February		0	0	0
March		0	0	0
April		223	0	223
May		6665	0	6665
June		4952	0	4952
July		6305	0	6305
August		5484	0	5484
September		953	0	953
October		1538	0	1538
November		0	0	0
December		0	0	0
Total		26120	0	26120
Comments				

Water Transfers	
8e. Water transfered	No
8f. Quantity transfered (Acre-Feet)	
8g. Dates which transfer occurred	/ to /
8h. Transfer approved by	

Water Supply Contracts	
8i. Water supply contract	Yes
8j. Contract with	USBR
8k. Other provider	USBR
8l. Contract number	14-06-200-849-A-R-1
8m. Source from which contract water was diverted	Sacramento River
8n. Point of diversion same as identified water right	Yes
8o. Amount (Acre-Feet) authorized to divert under this contract	67810
8p. Amount (Acre-Feet) authorized to be diverted in 2014	50858

8q. Amount (Acre-Feet) projected for 2015	50858
8r. Exchange or settlement of prior rights	Yes
8s. All monthly reported diversion claimed under the prior rights	Yes
8t. Amount (Acre-Feet) of reported diversion solely under contract	0

5. Water Diversion Measurement	
a. Measurement	Water directly diverted and/or diverted to storage was measured
b. Types of measuring devices used	Propeller Meter
c. Additional technology used	Flow Totalizer
	Description of additional technology used
d. Who installed your measuring device(s)	Representative using manufacturer's recommendations
e. Make, model number, and last calibration date of your measuring device(s)	
f. Why direct measurement using a device listed in Section 1 is "not locally cost effective"	
	Explanation of why use of devices and technologies listed in Section 1 are "not locally cost effective"
	Method(s) used as an alternative to direct measurement
g. Explanation of method(s) used as an alternative to direct measurement	

6. Purpose of Use	
Irrigation	6802 Acres

7. Changes in Method of Diversion	

8. Conservation of Water	
Are you now employing water conservation efforts?	Yes
a. Describe any water conservation efforts you have initiated	The District has worked with landowners and farmers within the place of use of this Statement to implement good water management and good farming practices including, but not limited to, laser leveling of fields, varietal changes and crop shifts. The quantity of water conserved through the actions taken by individual landowners and farmers has not been determined. In addition, the District operates an extensive tail water recovery and re-circulation system, and has implemented strict polices limiting spills from fields during irrigation season. Absent the District's re-circulation this additional quantity water would have been diverted to meet the demands within the District. The District also has a USBR approved conservation plan. The District idled 3686 acres due to a reduced contract supply which resulted in a reduction in the water needs within the place of use. Because the water savings due to all of these measures occurred under all of the District's various water rights, the quantity of water conserved has not been included in this report.
b. Amount of water conserved	Acre-Feet
I have data to support the above surface	

water use reductions due to conservation efforts.	
---	--

9. Water Quality and Wastewater Reclamation

a.	Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility, or water polluted by waste to a degree which unreasonably affects such water for other beneficial causes?	No
	Amount of reduced diversion	
	Type of substitute water supply	
b.	Amount of substitute water supply used	
	I have data to support the above surface water use reductions due to the use of a substitute water supply	

10. Conjunctive Use of Surface Water and Groundwater

a.	Are you now using groundwater in lieu of surface water?	No
	Amount of groundwater used	
b.	I have data to support the above surface water use reductions due to the use of groundwater.	

11a. Additional Remarks

Quantities shown include only water that was diverted or credited under this Statement. The quantities are allocated and reported under the Districts water rights based the priorities and limitations of the rights. The place of use is also served under License Nos. 2646 (A000244) and 4161 (A000770), Permit No. 21132 (A030812), and Contract 14-06-200-849A-R-1 with the USBR. In addition, lands were served by groundwater and recirculated tail water. The District participated in a water transfer program with the USBR in 2014 under which additional groundwater was pumped and served to the place of use in lieu of surface water deliveries under Contract 14-06-200-849A-R-1.
