**5. Water Diversion Measurement**

a.	Measurement	Direct measurement using a device listed in Section 1 is "not locally cost effective" for water directly diverted and/or diverted to storage
b.	Types of measuring devices used	
c.	Additional technology used	
	Description of additional technology used	
d.	Who installed your measuring device(s)	
e.	Make, model number, and last calibration date of your measuring device(s)	
f.	Why direct measurement using a device listed in Section 1 is "not locally cost effective"	Other
	Explanation of why use of devices and technologies listed in Section 1 are "not locally cost effective"	In most years, we do not use 100% of our 5,905 AcFt license face value. So, we have had no reason to justify meter/labor costs.
g.	Method(s) used as an alternative to direct measurement	Crop duty estimates/consumptive use estimates
	Explanation of method(s) used as an alternative to direct measurement	

**6. Purpose of Use**

Irrigation	640 Acres
------------	-----------

**7. Changes in Method of Diversion**

--

**8. Conservation of Water**

a.	Are you now employing water conservation efforts?	Yes
	Describe any water conservation efforts you have initiated	IN-FIELD recirculation ditches, gravity flow to LASER LEVELED fields, from recirculation ditch to the 2047 and south to next diverter's farm or ranch. Wild life habit all year. In this drought, 25% of our rice farm land was not planted. This further reduced amount of water diverted.
	Amount of water conserved	Acre-Feet
b.	I have data to support the above surface water use reductions due to conservation efforts.	

**9. Water Quality and Wastewater Reclamation**

a.	Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility, or water polluted by waste to a degree which unreasonably affects such water for other beneficial causes?	No
	Amount of reduced diversion	
	Type of substitute water supply	

b.	Amount of substitute water supply used	
	I have data to support the above surface water use reductions due to the use of a substitute water supply	

**10. Conjunctive Use of Surface Water and Groundwater**

a.	Are you now using groundwater in lieu of surface water?	No
b.	Amount of groundwater used	
	I have data to support the above surface water use reductions due to the use of groundwater.	

**11a. Additional Remarks**

25% of Arch J Campbell's rice land, was idled and not planted as part of the 25% cutback during the drought to conserve and reduce AcFt of water diverted.
