

TO WHOM IT MAY CONCERN -

As a resident of the Monterey Peninsula area and as a very compliant citizen as far as rules and regulations are concerned, I am horrified to imagine that your board would consider reducing our water usage by 30-50%. This seems very unfair considering our area's water usage is well below many areas in the state per capita. I do believe that it is time to figure out some satisfactory ways to improve the amount of water without penalizing the communities in our area served by Cal Am. I understand the water supply is a big issue, not only in our area but in the whole state. But you need to consider how important the Monterey Peninsula is to the state's tourism and economy, and it is imperative that we are able to maintain the natural beauty of the landscape that brings people here.

Sincerely - Linda C. Anderson
