

To Whom It May Concern;

Please accept this email as a concerned Carmel resident who strongly objects to a proposal of rationing water for our outdoor spaces. I am an avid gardener and have had many open house tours at my home that have benefited the Heritage Society of Carmel and the Garden Club of Carmel that have been restoring outdoor spaces in Carmel for years. Carmel is an active outdoor living City and to not value the beauty and choke off the plant life does not seem like a solution to the water problems. If this rationing is passed, there will be a huge loss of plant life and value to our properties and community. I respectfully encourage you to find other alternatives to the one that is proposed.
