

Do not punish the citizens of Monterey any more by cutting our water. We have the best conservation record in the state. It is not our fault that an alternate source for our water needs have not been met. Those in charge both the beaurocrats and the water boards - should be punished, not the innocent citizens.

Cutting our water allotment more so that we cannot water outside would be disastrous. Without periodic year around rainfall our gardens would die and our community would look like a wasteland. Almost everyone conserves now by using a nominal drip system coupled with native plants.

I say again, do not cut our water supply. Work together to find another source whether desalinization or other means. The citizens of Monterey have don there part in being the best at water cnservation in the sate. Now it's the water boards and Cal Am time to fix thses issue but now t on the backs of the citizens.

Don;t punish us by cutting our water!
