Subject: COMMENT LETTER - 10/20/09 BOARD MEETING CAL AM CDO

Board Members,

As a business member and resident of this community, I once again urge you not to approve the CDO. Moving this CDO forward will literally destroy our regional economy and further hinder any chance we have of creating a new and viable water solution going forward. What the CDO proposes will most definitely result in IRREPLACEABLE losses in revenue to our local communities because hotels rooms will not be open, visitors won't come, people can't work. If people can't work, there is absolutely no money and no resources to ensuring that a new water source is not only identified but implemented. As a community we have nothing but strong political will now and have worked very hard and very closely with our local officials, concerned citizens and agencies, and have found a viable solution in the Regional Water Plan. And with this momentum we have now it's a solution that can be accomplished by 2012.

Please consider all the comments and letters that you receive from people who actually live and work in this area on a daily basis, some of which have been here in this County for generations. Imposing this CDO is not the solution, it will only create a bigger burden and take even longer to find the solution. We realize that we have to work together, so we ask you do your part by working with us and giving us the time we need to get the Regional Plan in place.

Thank you.

Cynthia M. Buhl
