

# Smolt-to-Adult Survival Rates Keogh River Steelhead 1997 to 1999

- SAS has dropped from average of 15% to <4%
- Like wild coho, SAS increased in '97 and '98, but recently declined based on returns thus far of 1999 smolts

*Results for 1998 and 1999 are preliminary; 1999 estimates based on partial returns.*
