

**Figure.** “Half-pounder” steelhead captured with electrofisher in the lower Big Sur River adjacent to the walk-in campground in Andrew Molera State Park on 1 August 1995. This fish measured 346 mm TL. Stream flow on the day of capture was 38 cfs.

**Figure.** The scale on the left is from a 346 mm TL “half-pounder” steelhead caught in the lower Big Sur River on 1 August 1995, showing evidence of ocean growth. The arrow indicates the point at which the fish entered the ocean. The scale on the right is from a 787 mm TL adult steelhead from the Big Sur River for comparative purposes.
