Subject: June Stansahw Creek Photos

Hi Taro:

I hope you're well. [Here is a link](#) to Stanshaw Creek photos taken on June 23 (when the pool was drying up) and on June 29 after Doug Cole released water upon my request. The additional water that Doug released on June 25 allowed the pool to fill up. However, it was not enough water for Stanshaw Creek to reach the Klamath River.

One of the June 29 photos shows Stanshaw Creek water leaving MM Ranch destined for Irving Creek. This is more than enough water to allow Stanshaw Creek to reach the Kalmath River.

I am going to request that Doug release additional water so that the pool stays full and so the creek can reach the Klamath River.

Sincerely,
Konrad Fisher
