It was taken on January 26 2014. In the next couple of hours, I'll probably send you a video with a bit more footage that includes the place where Stanshaw water reaches Irving Creek. If it works, this video should replace the one you have and be the one you share.

Hi Konrad,

Thanks for the video footage. What day specifically did you take the footage? I just want to add it to the evidence that I am assembling that the video was taken on such and such date at around such and such time.

I also received flow data from Toz Soto yesterday, which provides a nice historic picture of the amount of flow being diverted vs. bypassed to Stanshaw.

Thanks,
Jon

Subject: Video of Stanshaw Diversion and confluence with Klamath

Hi Jonathan:

Here is a video of the Stanshaw diversion and it's confluence with the Klamath River: http://youtu.be/aMVZp_hwkQI I still need to add video of the place the diverted water meets Irving Creek. I thought I'd send this for now. I'll send you a link to a video that includes the additional footage ASAP.

Thanks again for your help. Feel free to contact me any time at 530.469.3218.

Best Wishes,
Konrad
