Martha,

The State Water Resources Control Board (SWRCB) supports the process that the stakeholders are undertaking, including the Mid Klamath Watershed Council sponsored water rights report, a draft of which was provided to the SWRCB in May 2014. If the report is relied upon as part of the physical solution process, that satisfies the requirements of the Department of Fish and Wildlife and the National Oceanic and Atmospheric Administration, the SWRCB will endeavor to continue its support in furtherance of a solution that allows for reasonable and beneficial water use by Marble Mountain Ranch and improvement of the conditions for coho salmon in Stanshaw Creek.

Thanks,
Jonathan Williams
