Before the State Water Resources Control Board

Proposed CDO Against Millview Water District

Russian River Watershed thence Pacific Ocean

In the Matter of Cease and Decrease Order Against Millview Water District -
Comment Letter - 10/18/11 Board Meeting - Millview CDO

Attn: Clerk of the State Water Board

The California Fisheries and Water Unlimited has reviewed the draft CDO against the Millview Water District. We agree with the findings of the staff of the Division of Water Rights, provided penalties and a fine is levied against Millview Water District at a rate of \$500 per day pursuant to Section 1052 of the California Water Code without exception. The reasons are that the State of California is bankrupt and the Russian River is environmental bankrupt. There is no good reason to not order fines against the Millview Irrigation District who willfully and knowingly stole Russian River water.

There are now 1700 more unauthorized diversions in the Russian River watershed to be stopped and penalized.

Place and copy the California Fisheries and Water Unlimited electronic comments into the records. Include the California Fisheries and Water Unlimited as an interested party into the proceedings. Electronic filings are admissible in court and should be made part of the records.

Respectfully Submitted
