Professional Experience

Santa Ana Watershed Project Authority

Senior Environmental Project Manager 2004- present

Environmental Project Manager 2002-2004

Implement and manage environmental projects and develop planning strategies on behalf of regional water agency. Also provide technical support and oversight in obtaining permits, negotiating easements, and implementation of agency construction projects. Examples of projects include:

- Management of multi-agency and stakeholder task force efforts supporting water quality and endangered species regulation;
- Mediation and development of integrated flood control and habitat restoration projects in the upper Santa Ana and San Jacinto watersheds;
- Implementation of a \$20 M watershed-wide invasive species and habitat restoration program;
- Development of integrated watershed, wetlands implementation, habitat restoration, and trail development plans;
- And, initiation of a regional GIS imagery purchase program, including development of model agreements.

West Valley Mosquito and Vector Control District, Chino, CA

District Manager 2001-2002

Managed operations of a Special District providing vector control and disease surveillance services to approximately 500,000 residents. Was responsible for all technical, budgetary and personnel functions. Refocused vector control program to one based on ecological principles and the use of biorational control agents. Also, chair of statewide advisory panel on pesticide regulation.

Northwest Mosquito and Vector Control District, Corona, CA

Vector Ecologist

1996-2001

Developed disease surveillance program for local agency, including methodology for identification of new disease agents of public health importance. Provided technical support and training for agency personnel. Insured agency regulatory and permit compliance for all aspects of operation.

Jenkins, Sanders and Associates, Long Beach, CA

Senior Environmental Scientist

1995-1996

Technical litigation support for several Natural Resource Damages cases. Was responsible for review of vertebrate toxicology and wildlife toxicant exposure claims.

University of California, Riverside, CA

Postgraduate Research Entomologist

1990-1995

Developed research program focused on the ecology of insects transmitting diseases to humans. Research was directed toward improved disease control, surveillance, and risk assessment.
