

Taken from amended
Appl 5169, filed 1-22-35

SUPPLEMENT TO AMENDED APPLICATIONS
5169 & 6534

General

The rights under application No. 5169 were purchased by the Washoe County Water Conservation District and the assignment of said rights regularly filed with your office. The proposed storage under application 5169 was 40,850 acre feet.

The plan of the applicant at that time was to construct a reservoir of approximately 90,000 acre feet capacity. Application 6534 was therefore filed for the right to store 50,000 acre feet.

Since the filing of application 6534 the enterprise has become a United States Reclamation Project and both the location and capacity of the proposed reservoir have been changed.

It is proposed to store all of the water under Application No. 5169 and the water under amended Application No. 6534 in the same reservoir. The reservoir will have a capacity of 50,000 acre feet and it is desired to have the right of storage for replenishment purposes, during such seasons as the water may be available, of 10,000 acre feet or a total combined storage right under amended applications 5169 and 6534 of 60,000 acre feet.

The original Application No. 6534 for a storage right of 50,000 acre feet has therefore been reduced to 19,150 acre feet, which added to the 40,850 acre feet under amended Application No. 5169 gives the total of 60,000 acre feet inclusive of a replenishment storage right of 10,000 acre feet.
