Page 77, claims 691 and (665), the name "Jodie" should be "Rosie" in each instance.

Pages 77 and 80, the column headings designated "In 1/4 of 1/4," "Sec.," "T-N," and "R-E," and those designated "Approximate Division," "Inches," "Sec. Feet," and "Estimated Transit Loss %," should be transposed.

Page 82, claim 720 1/2, the name "Domingo" should be "Domatego."

FINAL DECREE

This cause having been heretofore heard by the Court and, following argument by counsel, the matter having been referred to George F. Talbot, as Special Master, and the said Special Master having thereafter rendered his report and made his findings, and the same having been approved and adopted by the Court (except as disallowed or modified by the Court) by a certain order termed "Temporary Retaining Order" made and entered in said cause under date of February 13, 1926:

NOW, THEREFORE, in accordance therewith, IT IS HEREBY ORDERED, ADJUDGED AND DECREED AS FOLLOWS:

That the parties, persons, corporations, intervenors, grantees, successors in interest and substituted parties above and hereinafter named and their successors in interest and assigns are, and each of them is, as against every other one, hereby adjudged to be the owners of the water rights hereinafter specified and set forth and entitled and allowed to divert and use, from the Truckee River and its tributaries and from the streams, springs, drain and waste waters herein-after mentioned, and by and through their respective ditches, canals, flumes, dams and reservoirs, for the irrigation of their respective hereinafter described lands, for generating electricity and power, for municipal purposes, for supplying the people living in cities and towns, for reclamation of arid lands, for watering livestock, for domestic uses and other beneficial purposes, water in the respective amounts and subject and according to the respective dates of appropriation and priorities as hereinafter stated, found and allowed.

TRUCKEE RIVER DIVERSIONS

Government Rights

INDIAN DITCH

Claim No. 1. By order of the Commissioner of the General Land Office made on December 8, 1859, the lands comprising the Pyramid Lake Indian Reservation were withdrawn from the public domain for use and benefit of the Indians and this withdrawal was confirmed by order of the President on March 23, 1874. Thereby and by implication and by relation as of the date of December 8, 1859, a reasonable amount of the water of the Truckee River, which belonged to the United States under the cession of territory by Mexico in 1848 and which was the only water available for the irrigation of these lands, became reserved for the needs of the Indians on the reservation.

For the irrigation of 3,130 acres of Pyramid Lake Indian Reservation bottom lands, plaintiff, the United States of America, is entitled and allowed to divert from the Truckee River through the Indian Ditch, the intake of which is on the left bank of the river in Sections 18, T. 22 N., R. 24 E., Mount Diablo Base and Meridian, not exceeding 58.7 cubic feet of water per second to an amount not exceeding 14,742 acre feet of water in any calendar year with a priority of December 8, 1859; provided the amount of water so to be diverted shall not exceed a flow of one minor inch, or one-fourth of one cubic foot per second per acre for the aggregate number of acres of this land being irrigated during any calendar year and the amount of water applied to the land after an estimated transportation loss of 15 percent, shall not exceed 85-100 of an inch or 85-100 of one-fourth of one cubic foot per second per acre for the total number of acres irrigated, and provided that the amount of water so diverted during any such year shall not exceed 4.7 acre feet per acre for the aggregate number of acres of this land being irrigated during that year, and further provided that the amount

10

of water applied to the land shall not exceed four acre feet per acre for the aggregate number of acres of this land being irrigated during any calendar year.

This water is allowed for the United States and for the Indians belonging on said reservation and for their use and benefit and is not allowed for transfer by the United States to homesteaders, entrymen, settlers or others than the Indians in the event that said lands are released from the reservation or are thrown open to entry or other disposal than assignment or transfer to the Indians.

Claim No. 2. In addition to water for the above mentioned 3,130 acres of Pyramid Lake Indian Reservation bottom lands, the Government is hereby and will be allowed to divert water from the Truckee River, with a priority of December 8, 1859, to the amount of one-fourth of one cubic foot per second per acre for the irrigation of 2,745 acres of Pyramid Lake Indian Reservation bench lands. The water so allowed for bench lands may be diverted from the Truckee River through the Truckee Canal or any other ditch now or hereafter constructed as the plaintiff may desire or authorize; provided that the amount of water for bench lands shall not exceed during any calendar year 5.59 acre feet per acre diverted from the river, nor exceed during any calendar year 4.1 acre feet per acre applied to the lands, for the aggregate number of acres of this land being irrigated during any year.

This water is allowed for the United States and for the Indians belonging on said reservation and for their use and benefit and is not allowed for transfer by the United States to homesteaders, entrymen, settlers or others than the Indians in the event that said lands are released from the reservation or are thrown open to entry or other disposal than assignment or transfer to the Indians.

DERBY DAM AND TRUCKEE CANAL

Claim No. 3. Under the Reclamation Act of June 17, 1902, the United States, acting by the Secretary of the Interior, on July 2, 1902, withdrew from public entry, excepting under the homestead laws in accordance with the provisions of the Act, the lands required for the Government's first reclamation project, now known as the Newlands Project. Thereupon and with due diligence the United States proceeded with the construction of the Derby Dam across the Truckee River in the SW 1/4 of Section 19, in T. 20, N., R. 23, E., Mount Diablo Base and Meridian, and with the construction of the Truckee Canal, with a carrying capacity of 1,500 cubic feet of water per second, running from this dam a distance of 3 1/2 miles to the Lahontan Reservoir on the Carson River, and with the construction of the Lahontan Reservoir, with a storage capacity of 290,000 acre feet, and with the construction of about 250 miles of lateral and sub-lateral irrigation canals sufficient for carrying water for the irrigation of 151,000 acres. On April 30, 1919, the Government had expended for this project \$6,252,000.00. The lands so withdrawn for reclamation are naturally dry and arid and without the application of water are of little or no value, but with irrigation will produce valuable crops and furnish homes and support for a large population.

Subject to prior appropriations and vested rights permitted and confirmed by the Act of Congress of July 26, 1866, the plaintiff is entitled and allowed to divert, with a priority of July 2, 1902, through the Truckee Canal 1,500 cubic feet of water per second flowing in the Truckee River for the irrigation of 232,800 acres of lands on the Newlands Project, for storage in the Lahontan Reservoir, for generating power, for supplying the inhabitants of cities and towns on the project and for domestic and other purposes, and under such control, disposal and regulation as the plaintiff may make as desired, provided that the amount of this water allowed or used for irrigation shall not exceed, after transportation

loss and when applied to the land, 3.5 acre feet per acre for the bottom lands, not 4.5 acre feet per acre for the bench lands under the Newlands Project.

LAKE TAHOE STORAGE

Claim No. 4. Under the Reclamation Act and for irrigation and other beneficial uses on lands under said project and on lands within the basin of the Truckee, Carson and Humboldt rivers in Washoe, Storey, Lyon, Churchill and Humboldt counties, in the State of Nevada, and pursuant to notice posted by direction and authority of the Secretary of the Interior and for and on behalf of the United States, on the right bank of the Truckee River at the site of the dam in said river near Tahoe City and in Placer County, California, and about 500 feet downstream from Lake Tahoe, on the 21st day of May, 1903, plaintiff is entitled to, and is allowed with a priority of that date and during all seasons of the year, to have flow into and to hold and store in Lake Tahoe and in a reservoir made of said lake by a dam at said site in said river constructed with the spillway crest thereof six feet above the floor of the flow-way of said dam as then existing, all waters of or coming into said river or said lake, both surface and under flow, to the extent of 3,000 cubic feet per second and to the extent of the capacity of said lake as a reservoir made by said dam, to said height and subject to the continuous out-flow through said river from said lake or reservoir so made, by said lake or dam, of such an amount of water as plaintiff may desire to release or may discharge from said lake or reservoir not exceeding at any time a flow of 3,000 cubic feet of water per second.

In addition to the above specified rights the United States is entitled to store, discharge and control water in Lake Tahoe as provided in the judgment and decree filed and entered on June 4, 1915, in the case of the United States, plaintiff, versus The Truckee River General Electric Company, a corporation defendant, in the District Court of the United States in and for the Northern District of California, Second Division, and subject to said decree the United States shall be entitled to discharge from Lake Tahoe an amount of water sufficient to deliver to the head of the Truckee Canal at the Derby Dam, after transportation loss, 1,500 cubic feet per second. The plaintiff is entitled and allowed at will to release and discharge any of the water stored, or by this decree allowed to be stored, in Lake Tahoe and to flow the same and any other water in which it is entitled, according to its priority, through the Truckee River to the Derby Dam and there divert the same through the Truckee Canal for irrigation, for storage in the Lahontan Reservoir, for generating power and for other purposes. The rights of said defendant Sierra Pacific Power Company (formerly The Truckee River General Electric Company) under said judgment and decree are hereby recognized and confirmed.

Power Ditches

FARAD PLANT

Claim No. 5. The Sierra Pacific Power Company, a corporation owner, is entitled and allowed to divert at all times from the Truckee River through the Farad Power Flume, which has its intake on the north bank of the Truckee River in the SW $\frac{1}{4}$ of Lot 6 in the NW $\frac{1}{4}$ of Section 30, Township 16 North, Range Eighteen East, sufficient water, with a priority of the year 1899, to deliver, after transportation loss, to the wheel of the Farad Hydro-Electric power plant, 325 cubic feet of water per second and sufficient additional water with a priority of 1906 to deliver, after transportation loss, to the wheel of said plant, 75 cubic feet of water per second, said plant being situate in the SE $\frac{1}{4}$ of Section 12, Township 16 N. R. 17 E., for the generation of electric power in said plant.

FLEISH PLANT

Claim No. 6. The Sierra Pacific Power Company, a corporation owner, is entitled and allowed to divert at all times from the Truckee River through the Fleish Power Ditch and Flume, which has its intake on the east bank of the Truckee River in the SE $\frac{1}{4}$ of Section 6, Township 18, N. R. 18 E., sufficient water with a priority of February 16, 1904, to deliver, after transportation loss, to the wheel of the Fleish Hydro-Electric power plant, 327 cubic feet of water per second, said plant being situate in the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 30, Township 19 N. R. 18 E., for the generation of electric power in said plant.

VERDI PLANT

Claim No. 7. The Sierra Pacific Power Company, a corporation owner, is entitled and allowed to divert at all times from the Truckee River through the Verdi Power Ditch and Flume, which has its intake on the east bank of the Truckee River in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 19, T. 19 N. R. 18 E., sufficient water, with a priority of October 21, 1909, to deliver, after transportation loss, to the wheel of the Verdi Power Plant 399 cubic feet of water per second, said plant being situate in the SE $\frac{1}{4}$ of Section 8, T. 19 N. R. 18 E., for the generation of electric power in said plant.

In addition to such diversion for power purposes, Sierra Pacific Power Company, a corporation, is allowed to divert from said river through the Verdi Power Ditch 720 inches or 5.50 cubic feet of water per second for supplying the Katz Ditch for irrigation to the extent and with the priority herein after allowed to this company, for the Katz Ditch under irrigation right.

In addition to such diversion for power purposes and for supplying the Katz Ditch with water for irrigation, Sierra Pacific Power Company, a corporation, is entitled and allowed to divert and transport from the Truckee River, through the Verdi Power Ditch and Flume and to deliver to Verdi Lumber Company, a corporation, and Verdi Lumber Company is entitled to have diverted from said river through said ditch and flume by, and to receive from the Sierra Pacific Power Company, 100 inches of water with a priority of the year 1894 for supplying and maintaining the log pond of the Verdi Lumber Company in the Town of Verdi, and for logging and saw mill purposes.

WASHOE PLANT

Claim No. 8. The Sierra Pacific Power Company, a corporation owner, is entitled and allowed to divert at all times from the Truckee River through the Washoe Power Ditch and Flume, which has its intake on the south bank of the Truckee River, in the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 16, T. 19 N. R. 18 E., sufficient water, with a priority of October 27, 1902, to deliver, after transportation loss, to the wheel of the Washoe Hydro-Electric Power Plant 396 cubic feet of water per second, said plant being situate in the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 14, in said township and range, for the generation of electric power in said plant.

Of the water so allowed to be diverted through the Washoe Power Ditch and Flume, Sierra Pacific Power Company is allowed to use during the irrigation season 12.4 inches or .31 cubic feet of water per second, not exceeding a reasonable amount of 50 acre feet for the irrigation of 12.4 acres of its land as herein after described and provided under Washoe Power Ditch under irrigation rights.

Also of the amount of water allowed to be diverted through the Washoe Power Ditch, Sierra Pacific Power Company is entitled and allowed to deliver to the defendant Leonidas Fredrick Johnson and be it entitled and allowed to

have and receive from Sierra Pacific Power Company, 50 inches or 1.25 cubic feet of water per second, to the seasonal amount of 257 acre feet, for the irrigation of his land as described and as provided hereinafter under Washoe Power Ditch under irrigation rights.

RENO PLANT

Claim No. 9. The Sierra Pacific Power Company, a corporation owner, is entitled and allowed to divert at all times from the Truckee River through the Reno Power Ditch and Flume, which has its intake on the south bank of the Truckee River 1365 feet north, 35 degrees west from Quarter Section corner between Section 15 and 16, T. 19 N., R. 24 E., sufficient water with a priority of March 31, 1897, to deliver, after transportation loss, to the wheel of the Reno Hydro-Electric Power Plant, 250 cubic feet of water per second, and sufficient additional water with a priority of November 1, 1909 to deliver after transportation loss, to the wheel of said plant 46 cubic feet of water per second, said plant being situated in NE $\frac{1}{4}$ of NE $\frac{1}{4}$ Section 15, in said township and range, for the generation of electric power in said plant.

In addition to such allowed diversions for power purposes through the Reno Power Ditch and Flume, Sierra Pacific Power Company is entitled and allowed to divert from the Truckee River and convey through said ditch and flume and deliver to defendants Sarah McClure, James Murray, William Murray and Sam Murray and their successors, and they are entitled and allowed to have, and receive from said company, 50 inches of water for the irrigation of their lands as hereinafter described and provided under Indian Flat Ditch under irrigation rights.

RIVERSIDE MILL DITCH

Claim No. 10. The Riverside Mill Company, incorporated, owner, is entitled and allowed to divert at all times from the Truckee River, through the Riverside Mill Ditch and Flume, which has its intake on the north bank of the Truckee River at a point 84 feet westerly from the center of Chestnut Street in the City of Reno and in the NW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 11, T. 19 N., R. 24 E., 70 cubic feet of water per second with a priority of May, 1863, for operating the Riverside Flour Mill in the City of Reno and for generating power and for milling purposes.

WADSWORTH POWER PLANT

(Solicitor: James T. Boyd)

Claim No. 13. The Wadsworth Light and Power Company, incorporated, owner, is entitled and allowed to divert at all times from the Truckee River, through the Wadsworth Light and Power Company Ditch, which has its intake on the north bank of the Truckee river in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 13, T. 20 N., R. 23 E., Mount Diablo Base and Meridian, 31.3 cubic feet of water per second with a priority of June 26, 1897, for delivering, after an allowed transportation loss of 20 per cent, 25 cubic feet of water per second to the wheel at the pumping and power plant of this company, situated in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 33, in T. 21 N., R. 24 E., M.D.M., for the operation thereof and for pumping and for generating electrical and other power.

WADSWORTH WATER SUPPLY

(Solicitor: James T. Boyd)

Claim No. 14. In addition to the amount of water so allowed to be diverted for generating power, for pumping and the operation of its plant, the Wadsworth Light and Power Company is entitled and allowed to divert at all

times from the Truckee River through its said power ditch, for supplying the Town of Wadsworth and the people living in or near this town with water for fire protection, for the irrigation of their lawns, gardens and lands, and for house-hold and other purposes, 3.13 cubic feet of water per second with a priority of June 26, 1897, for the delivery, after an allowed transportation loss of 20 per cent, of 2.5 cubic feet of water per second to the reservoir of said company in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 33, in T. 21 N., R. 24 E., M.D.M., and to said people for said purposes. (See Irrigation Rights for irrigation water allowed under this ditch, No. 635.)

WINTER DITCH REGULATION

The owners and operators of ditches through which the diversion of water is allowed for generating electricity and power and for milling, mechanical and municipal purposes, and for supplying the inhabitants of any city or town, whenever ice shall collect in any of their ditches, shall be allowed to divert from the Truckee River and use such additional amount of water as may be required for flushing out such ice and so long only as may be required for such flushing, provided that the water diverted for such flushing shall not in any case be more than 20 per cent of the amount which is fixed and allowed by this decree to be diverted through the ditch in which said flushing is done.

All water diverted or used for generating electricity or power or for operating mills or power plants shall be returned directly to the Truckee River after being so used. Extra water for preventing congestion by ice and for flushing ice allowed to be used in ditches supplying water for municipal purposes when required must be returned directly to the river when used for these purposes.

IRRIGATION RIGHTS

The parties, persons and corporations hereinafter named and their grantors and predecessors in interest have acquired rights of appropriation in, and have diverted and appropriated from the Truckee River and its tributaries and used for the necessary irrigation of their respective hereinafter described lands, water in the respective amounts and under the respective priorities as stated in the following table. As shown by the following tabulations and columns, each of the parties, persons and corporations named in the columns headed, "Owner," directly or by his, her or its grantor or predecessor in interest, on and continuing after the date in the columns headed "Date of Priority" and opposite his, her or its name or connection therewith, and through the ditch or ditches named in the columns headed "Ditch" and opposite his, her or its name or described lands, for the necessary irrigation of his, her or its lands so described opposite his, her or its name and in the columns under the words "Acres Irrigated" and following columns, diverted and appropriated water in the amount or amounts stated opposite his, her or its name or described lands and in the columns headed "Approximate Diversion," and water sufficient to deliver to his, her or its said lands after transportation loss, the amounts in flow and acre feet per season stated opposite his, her or its name or described lands and in the columns under the words "Amount Allowed Delivered to Land":

BACK DITCH AND JONES WASTE DITCH

The Back Ditch, which has heretofore been called the Frost, Alt and Savage Ditch, the Kiely Ditch and the Kloupe Ditch, was constructed in or about the year 1862, for the purpose of irrigating lands on the Ghiglieri ranch, formerly known as the Frost ranch, the Kiely ranch and the Kloupe ranch, and lands on the Alt ranch now owned by defendant Charles W. Mapes, and lands on the Savage ranch, also now owned by the defendant Mapes. The Back Ditch has its head on the southerly bank of the Pioneer Ditch, in SE 1/4 of Section 17, in T. 19, N., R. 29, E., M.D.M., and thence runs in a southeasterly direction across the lands of the defendant Andrew Ghiglieri and across the line between the Ghiglieri ranch and the Alt ranch, at which line it crosses on a flume over the Jones waste ditch and from there runs in an easterly and southerly direction over the lands of the defendant Mapes on the Alt and Savage ranches.

Originally and until changed by the defendant Charles Jones, a narrow swale was used as part of the Back Ditch for carrying the water therein for a distance of more than 800 feet before it reached the dividing line between the Ghiglieri and Alt ranches, near said flume, and onto and over lands on the Alt ranch. In the year 1905 the defendant Charles Jones, placed a dam across this swale at a place about 800 feet above and northwesterly from said flume and with permission from M. J. Kiely, predecessor of the defendant Ghiglieri, who then owned the land, dug a ditch along the northeasterly bank of said swale from said dam to said flume and from said dam to said flume changed said Back Ditch and the water flowing therein from said swale to said ditch so dug by said Jones. Ever since that ditch was so dug by said Jones it has been and now is, a part of the Back Ditch and as such has changed the water running therein during the irrigating season.

Defendants Charles W. Mapes and Andrew Ghiglieri are, and they and their grantors for more than 60 years have been, the owners of the Back Ditch and are, and since its construction have been, the owners of said ditch so constructed by said Jones which was situated for said swale as a part of said Back Ditch. As such owners the defendants Charles W. Mapes and Andrew Ghiglieri are entitled and allowed to convey through the Back Ditch, as so changed by the defendant Jones, and over and across said flume and in said ditch as extended beyond and below said flume, such portions of the water which by this decree they are allowed to divert from the Truckee River through the Pioneer Ditch as they deem necessary, not exceeding one inch per acre for the irrigation of those parts of their lands above described, which are under and subject to irrigation from the Back Ditch and not exceeding the amount of four acre feet per acre of water per annum.

Subject to, and without interference with the primary right of the defendants Andrew Ghiglieri and Charles W. Mapes, to convey water from Pioneer Ditch through the Back Ditch for the irrigation of their lands lying thereunder as above provided, the defendants Charles Jones and Jane Jones as a secondary right are entitled to convey through Back Ditch from the head thereof to said flume and to and through the Jones Waste Ditch and onto their lands above described and for the irrigation thereof, 40 inches of the water which as heretofore allowed, they are entitled to divert from the Truckee River through the Pioneer Ditch for the irrigation of their lands provided that they shall not divert from the river at any one time more water than sufficient to allow flows onto their lands aggregating 537 inches nor more than 2500 acre feet per annum for the irrigation of all their lands.

The defendants Charles Jones and Jane Jones are also entitled and allowed to use for the irrigation of their lands the waste waters coming from the Ghiglieri ranch and from the lands above into the Jones waste ditch, which runs along the west side of the line between the Ghiglieri and Alt ranches from the county road to and under

the said...me and which a few rods southerly from said dike, runs and runs in westerly direction to the lands of defendants Jones, provided that the flow of water from the Pioneer Ditch and from waste water used by the defendants Charles Jones and Jane Jones for the irrigation of their lands, shall not exceed in the aggregate 537 inches applied to the lands and that they shall not apply to the land more than 2758 acre feet per annum.

GENERAL PROVISIONS

In the foregoing table and columns pertaining to irrigation water rights the word, "Direct," means that the acreages specified thereunder are irrigated by water hereby allowed to be diverted from the river, creek or stream last named above the acreage, the word, "Drain," means that the acreages thereunder are irrigated by drain or waste water hereby allowed and ordered for the irrigation thereof; the word, "Season," means the time in any calendar year when irrigation may be needed; the word, "Priority," means the time when the water right was initiated, "Inch," means one-fortieth (1/40th) of one cubic foot per second, which, in general is the amount of water which will flow through an orifice having an area of one square inch, under a pressure of six (6) inches at the center of the opening. "Acre Foot," means the amount of water which will cover an area of one acre to a depth of one foot.

All of the above described ditches, lands and sections are in townships north and ranges east, Mount Diablo Base and Meridian. All of the irrigated lands are in the State of Nevada, except a part of the tracts listed under Dog, O'Neil, and Sunrise creeks. All of the ditches, canals and flumes are in the State of Nevada excepting the Farad and the upper end of the Fleisch, Lake Tahoe is partly in Nevada and partly in California and the outlet of the lake to the Truckee River and the dam controlling the storage in the lake are in the State of California.

Without the application of water thereto the above described lands are dry and arid and irrigation is necessary for the production of valuable crops thereon. The respective amounts of water hereinbefore stated to have been appropriated for or used on these lands, are in each instance as specified therefor necessary and sufficient for the reasonable and economical irrigation of crops thereon other than grain, potatoes, corn and beans. These do not need to be irrigated for so many months as alfalfa and pasture. Only two-thirds of the amount of water in acre feet hereinbefore specified or allowed for the irrigation of any of the above described tracts of land is necessary for, or should be or is allowed for the irrigation of grain grown thereon. Only four-

fifths of the amount of water in acre feet designated above for the irrigation of said tracts of land is necessary for, or should be or is allowed for, the irrigation of potatoes, corn or beans grown thereon. Young alfalfa needs frequent irrigations for a long season. An additional amount of ten per cent of the quantity of water hereinbefore specified in acre feet for the irrigation of any of the above described lands is necessary for and should be and is allowed for the irrigation thereof during the first year that alfalfa is sown thereon, whether the alfalfa be sown with or without grain.

The amounts of water which the parties to this action have appropriated and used for purposes other than the irrigation as stated above are necessary and sufficient for the uses for which they have been appropriated.

The above named parties who so appropriated water for irrigation have also used and in addition thereto are entitled and allowed to use water for livestock and domestic purposes, but only in such amounts as may be necessary for watering stock and for domestic purposes; provided that the priority in respect of the use of water for livestock and domestic purposes of any person shall be identical with the priority of such party for irrigation.

IT IS FURTHER ORDERED AND DECREED that that certain agreement known as the Truckee River Agreement, dated July 1, 1895, entered into by the United States of America, party of the first part, Truckee-Carson Irrigation District, party of the second part, Washoe County Water Conservation District, party of the third part, Sierra Pacific Power Company, party of the fourth part, and such other users of the waters of the Truckee River as may have or shall become parties to said agreement by signing their names thereto, parties of the fifth part, which agreement provides (among other things) for the upstream storage of the waters of the Truckee River and its tributaries, be and the same is hereby approved, adopted by the Court and made a part of the decree and shall be binding as between the signatory parties to said agreement.

Water for irrigation is allowed to be used at any time, provided that the amount applied to the land during any calendar year shall not exceed the quantity in acre feet allowed to the land.

No owner or person or party entitled to the use of water under this decree shall be allowed to use for irrigation during any calendar month more than twenty-five per cent of the quantity of direct water in acre feet hereby allowed for the land for the season.

If it shall appear at any time in regard to the actual use and need of water for irrigation that the amount heretofore estimated and allowed to be diverted from the river or stream into any ditch or canal is not sufficient after transportation loss to deliver to the land the flow allowed by this decree for application to the land, the allowance or flow as fixed by this decree for application to the land shall control, and there may, and hereby is allowed to be diverted from the stream a larger amount than the amount heretofore estimated for diversion from the stream, to the extent necessary to supply to the land, after actual transportation loss, the flow of water allowed by this decree for application to the land. Whether more or less than the amount heretofore estimated for diversion from the stream by any ditch, the quantity of water diverted for irrigation shall in every case be only such an amount as will supply to the land, after actual transportation loss, the amount of water allowed by this decree for application to the land and only the quantity needed for the irrigation thereof.

When any other user will thereby be deprived of any part of the water to which he is entitled, no ditch owner or user shall be allowed to divert away from the stream extra water for regulating the flow in any ditch.

The parties, persons, corporations, intervenors, grantees, successors in interest and substituted parties heretofore named, and their and each of their servants, agents, attorneys, assigns and all persons claiming by, through or under them and their successors, in or to the water rights or lands herein mentioned or described, are and each of them is hereby forever enjoined and restrained from asserting or claiming any rights in or to the waters of the Truckee River or its tributaries, or the waters of any of the creeks or streams or other waters hereinbefore mentioned except the rights, specified, determined and allowed by this decree, and each and all of said parties, persons, corporations, intervenors, agents, attorneys, servants, assigns and successors in interest; and all persons claiming by, through or under them, are hereby perpetually restrained and enjoined from diverting, taking or interfering in any way with the waters of the Truckee River or its tributaries or with waters of any of the creeks or streams, or with any of the other waters hereinbefore mentioned, so as to in any manner prevent or interfere with the diversion, use and enjoyment of the waters of any of the other persons or parties as allowed or adjudicated by this decree, having due regard to the relative priorities herein set forth; and each of the said parties and persons and each of their agents, servants, attorneys and employees is hereby enjoined and restrained from ever taking, diverting, using or claiming any of the water so decreed, in any manner or at any time so as to in any way interfere with the prior rights of any other persons or parties, having prior rights under this decree, as herein set forth, until such persons or parties having prior rights have received for their several uses the waters hereby allowed and adjudged to them.

Except as herein specially provided no diversion of water into any ditch or canal, in this decree mentioned shall be permitted except in such amount as shall be actually, reasonably necessary for the economical and beneficial use for which the right of diversion is determined and established by this decree. The amounts of water heretofore allowed are declared to be sufficient for the uses herein mentioned, and any and all use of water in excess of such decreed amounts is declared to be wasteful, and all wasteful or excessive use of water is hereby prohibited.

In any case where water is obtained from two or more sources, the aggregate amount of the combined waters from such sources which may be used, shall not exceed the amount required for such use as herein determined.

Whenever in this decree words of ownership are used in connection with any irrigated lands, such words shall not adjudicate, determine or affect any property rights therein, and this decree does not and shall not in any way determine the title to or rights in any property whatsoever, other than the right to the diversion and use of water as herein determined and established. In the cases where, by this decree, water is allowed to be diverted through any ditch by the owner thereof for another party the conditions of any contractual relations existing between them are not hereby determined.

A Water Master shall be appointed by this Court to carry out and enforce the provisions of this decree and the instructions and orders of the Court, and if any proper orders, rules or directions of such Water Master, made in accordance with and for the enforcement of this decree, are disobeyed or disregarded he is hereby empowered and authorized to cut off the water from the ditch or canal owners or water users so disobeying or disregarding such proper orders, rules or directions, and the Water Master shall promptly report to the Court his said action in such case and the circumstances connected therewith and leading thereto. Whenever the necessities of the situation appear to the Court to so require, the Court shall authorize the employment by the Water Master of such person or persons to assist the Water Master as the Court may deem necessary to properly carry out the provisions of this decree and the orders of the Court. The terms of employment, expenses and compensation of said Water Master and his assistants, the payment thereof and the means and methods for securing funds with which to pay the same, shall be fixed by orders which the Court may hereafter from time to time make. The compensation and expenses of the Water Master and his assistants shall be borne by the parties whose rights are adjudicated by this decree in the following manner, to-wit: One-third by the United States, one-third by the Sierra Pacific Power Company, and the remaining one-third by the remaining persons or corporations whose rights are adjudicated by this decree. Any person feeling aggrieved by any action or order of the Water Master may in writing and under oath complain to the Court, after service of a copy of such complaint on the Water Master, and the Court shall promptly review such action or order and make such order as may be proper in the premises.

The owner or owners of each ditch or canal herein authorized to divert water from the Truckee River or any of its tributaries, or from any ditch or canal or other waterway receiving water therefrom, shall, within sixty (60) days after the entry of this decree, or such lesser time as may be fixed by the Water Master, install and thereafter at all times properly maintain in such ditch, canal or other waterway, a reliable, sufficient and easily-operated regulating headgate and locking and measuring devices, to be approved by the Water Master, whereby the water diverted into such ditch, canal or other waterway at any and all times may be properly regulated and correctly measured.

The stored water of any reservoir, including Lake Tahoe, may be turned into and carried in the channel of any natural stream and mingled with the waters thereof and diverted therefrom for the proper uses of the persons or parties entitled thereto. The Water Master, upon timely notice, shall so regulate the headgates along the streams and do and direct to be done such other things as may be needful to transport such stored water and deliver the same to the person or persons entitled thereto. All persons are hereby prohibited from in any way interfering with any such stored water while the same is being legally carried to the persons or parties entitled thereto.

said Temporary Restraining Order herein on February 13, 1926; and such adjudication shall not be deemed to limit, reestablish, or otherwise affect any rights acquired, created or lost subsequently thereto by conveyance, transfer, abandonment, non-user, contract (including said Truckee River Agreement) or otherwise, but the rights of the United States shall be as herein adjudicated as of the date of this decree save only as the same may be affected by said Truckee River Agreement.

Done in open court this 8th day of September, 1944.

FRANK H. NORCROSS,

District Judge.

The quantities of water permissible to be diverted by the owners of the several ditches, through said ditches, on account of the several priorities herein decreed, are decreed subject to the obligations of said owners to divert and use water only at such times as needed and only in such amounts as may be required under a reasonable, economical and beneficial use. Rotation, or the combining and exchanging of the use of water between ditches and among users shall be permitted when necessary in order to obtain reasonable economy in the use of the water of the river or other stream, or in order to give to each ditch or user a more advantageous irrigation head, provided that such rotations shall not injuriously affect any of the rights determined and allowed by this decree. The Water Master may arrange for such rotations and consult with and endeavor to obtain the agreements of the various water users thereto, as the occasion may require and shall promptly report to this Court his action in the premises.

All users of water allowed by this decree a flow of less than one inch per acre for his, her or their respective lands may, with the consent of the Water Master or by his direction to the owners or person in charge of the ditch through which the water is conveyed, use when needed for the irrigation of his, her or their land, a larger flow than specifically allowed by this decree, up to and not exceeding one inch per acre, provided the amount of water used during any calendar year shall not exceed the seasonal acre feet allowance for the land, and that the flow allowed would not, if continuous, deliver in any one month in excess of twenty-five (25) per cent of the seasonal allowance in acre feet heretofore in this decree specifically allowed for said lands.

Whenever any person or party shall not be receiving the amount of water to which he is entitled under this Decree, the Water Master shall, upon request open, close, lock and regulate the necessary headgates, ditches and other works used for the diversion and application of such waters as to apportion the same as herein provided, and for that purpose may enter upon the lands of any and all persons having rights adjudicated by this Decree.

Persons whose rights are adjudicated hereby, their successors or assigns, shall be entitled to change, in the manner provided by law the point of diversion and the place, means, manner or purpose of use of the waters to which they are so entitled or of any part thereof, so far as they may do so without injury to the rights of other persons whose rights are fixed by this decree.

The State of Nevada is not a party to this suit but the rights of the State to water through different ditches which divert from the Truckee River for the State and numerous parties to this action have been estimated for convenience and purposes of administration.

The several parties to this suit shall pay and bear their own costs.

Said Sierra Pacific Power Company is the identical party and corporation referred to herein and in the "Temporary Restraining Order" made and entered in said cause on February 13, 1926, as the "Truckee River General Electric Company, a corporation", the name of said corporation having been heretofore changed, pursuant to law, from the Truckee River General Electric Company to Sierra Pacific Power Company.

The foregoing adjudications set forth in Claims Numbers 1 to 744, inclusive, of this Decree are based upon conditions existing at or prior to the entry of
