Subject: Legislation concerning Sea Ranch

The negative effects of restricting the supply of water to Sea Ranch has our communities worried on many levels. The recent economic downturn has already reduced property values. A reduction in the amount of water to Sea Ranch will further effect values. Some people who are retired and can not afford to have their homes devalued. Realtors are concerned about not disclosing this information to prospective clients further depressing the real estate market.

Tourism is important to the nearby town of Gualala. Renters from Sea Ranch shop and eat there. Rentals will be effected if there is no water. This will also effect the business owners, some living in Sea Ranch.

The fact that no meeting about this issue was held on the coast did not allow Sea Rancher a chance to hear locally and voice their feelings about this issue.

Please reconsider including Sea Ranch and negatively impacting the lives of the people.

Cheryl Ross
