Subject: AB2121 Proposed policy for Maintaining Instream Flows

To the SWRCB
We support what you are proposing to do but have serious concerns about the details. We do not see adequate consideration for the significant differences in terrain inland and near shore nor the financial and cultural differences in impact the change will have. We suggest a delay of several months so the interested parties can help present information that may complicate the policy but will ultimately achieve the desired goal without the disparate impact of the current proposed policy.

Sincerely
Dan and Teri DeBra
