Subject: North Coast Instream Flow Policy - AB2121

Jeanine Townsend,

How in the world has this potential mess with our water been allowed to happen. Do you realize the impact this will have on our coastal community, The Sea Ranch and Gualala? The entire community will collapse. If water is not available on a regular basis to our homes and business; we will all loose. The value of our homes will be zero, and businesses will be forced to close. Many of us will be forced into foreclosures and bankruptcy. There will be a huge loss of tax revenue to the counties and state, which has been in trouble for sometime. You just can't do this to people's lives. And what for, to enhance the habitat the fish? Please hear us and have those responsible for this potential disaster come to their senses.

Praying for your common sense,
Frances Alman
