Subject: AB 2121 Policy

Chairman Charles R. Hoppin and Members
State Water Resources Control Board

We are in support of James A. Jordan Chair, Board of Directors The Sea Ranch Water Company letter of March 23, 2010 regarding the extension of time for the implementation of AB 2121. Specifically we ask that the implementation be in a reasonable manner and your attention to the 3 bullet points on the second page of his letter.

It should be noted that The Sea Ranch is one of the most environmentally conscience communities in the country and support instream flows in Northern California. Yet it's important to realize our concerns and overall impact on unilateral implementation of AB 2121 without reviewing our concerns,

Sincerely,
Gary & Carol Hunter
