Re: 2010 Draft Instream Flow Policy

This letter is to request an extension of time for public comment on this policy which if adopted has a potentially devastating effect for thousands of people who may be left without water for long periods. This is totally unacceptable.

Also, this is to request that any meeting of the NCWRCB to adopt this policy be held here on the coast where the affected people live and not in Sacramento !!

A handwritten signature in cursive script that reads "James Daniel".

James Daniel
