Subject: COMMENT LETTER AB2121 POLICY

In applying the captioned proposed policy to the South Gualala River, without consideration of its characteristics, the burden upon the residents of the area is extreme to the extent that an entire community will be without water for months during lean years. The Board is requested to make the environmental study prior to implementing the policy as a reasonable exercise of administrative discretion. We believe that the current policy for the river adequately protects the fishery and the general environment. To include the area without proper consideration would constitute the absence of the exercise of the required discretion.

Respectfull submitted
