Subject: COMMENT LETTER AB23121 POLICY

Dear Sirs,

We have lived at The Sea Ranch for 24 years and, along with many neighbors, have been careful with our use of water. This has lead to exemplarily water conservation here.

The Sea Ranch followed state guidelines years ago to build a reservoir for water storage during months of low river flow; water was pumped only when conditions were right. To change the guidelines now is obviously unfair without more consideration to its effect on the community.

We urge you not to adopt this bill as currently written. Please take into account the full economic effect of this policy on Sea Ranch residents.

Thank you for your consideration,

John N. and Katherine C.Horn, Unit 28, Lot 71
