SUBJECT: Comment LETTER AB 2121 POLICY FEB 2010 DRAFT NORTH COAST
INSTREAM FLOW POLICY - STRONG OBJECTION TO THIS DRAFT POLICY AND REQUEST
FOR EXTENSION OF TIME

SWRCB staff has recommended a policy that would have drastic negative impacts on the Sea Ranch water supply. It would leave The Sea Ranch without water supply for days or months each year and as a result affect property values significantly.

As a multiple home owner and real estate broker I feel the proposed policy should be scrapped or revised to require that economic and other impacts on water users be taken into account and avoided. The policy should be evaluated including burden as well as benefit.

Thank you.

Kris Rose
