Dear SWRCB,

It has been brought to my attention just recently that a great portion of the coastal communities of Sea Ranch and Gualala will be severely affected by the proposed policy to enhance the instream flow. A decision to make these changes will affect many people and businesses in the area, I am talking sever affects!

I am asking you now to postpone any decisions and to have public meetings so you can get the heartbeat of the communities involved. It is best for all involved, we must work together on this issue.
