In response to AB2121, the State Water Resoueces Control Board staff has recommended a proposed policy, applicable regionally, that would have drastic negative impacts on the The Sea Ranch water supply. It would leave The Sea Ranch residents without water supply for days or even months each year.

The Sea Ranch water rights and facilities were developed to meet both fish and resident needs. The Sea Ranch has an excellent water conservation program with a record of very low gallons per capits per day usage. The Sea Ranch residents are mostly retired people who have put their life savings into their homes and do not have earning years ahead of them to suffer a loss of these homes due to lack of water. If the proposed policy is put into effect, property values will plummet, and homes may be uninhabitable on a regular basis.

I urge you to reconsider this policy and to find a way to protect the fish and the community.

Thank you.  
Nancy Rowinsky  
resident - The Sea Ranch
