Sir/Madam

I am writing to voice my concern over the Harmful Effects of the Proposed State Water Resources Control Board (SWRCB) Instream Flow Policy on The Sea Ranchs' Water Supply. I believe the proposed policy should be revised to require that the economic and other impacts to current water users be taken into account. The policy should be evaluated by including burden as well as benefit. The policy should employ science that addresses conditions like those found on the South Fork Gualala River not a one size fits all approach.

Regards
