Subject: Comment Letter AB2121 Policy

Dear SWRCB Members,
I believe the proposed policy should be revised to require that the economic and other impacts to current water users be taken into account. The policy should be evaluated by including burden as well as benefit. Further, the policy should employ science that addresses conditions like those found on the South Fork Gualala River.

I have significant concerns about your staff recommendation regarding the above noted matter. I hereby request that the policy not be adopted in its present form without a revision to take into account the burdens it presents.

I thank you in advance for reconsidering the effects of this legislation.

Trudy Armer,
The Sea Ranch
