

CERTIFICATION OF PROFESSIONAL ENGINEER

I have examined the water facilities and uses described in this Alternative Compliance Plan. To the best of my knowledge and experience, the Pelton Wheel measurement system will meet the requirement of approximately 10% accuracy. The methods of measuring irrigation, pond use and domestic use upon the site are a reasonable method of measurement. Installation of meters is not practical as a means of instantaneously or cumulatively measuring water use and consumption on this property, except as to use within the home and warehouse. All return flow returns to Big Chico Creek.
