

PERMIT TERM K2

Title: Dam Safety – Not Built

When Used: In permits when a protest on dam safety has been filed, and the dam is not within the jurisdictional size of the Division of Dam Safety; and it appears that dam failure would pose a threat to life or downstream property.

Term:

Construction of the storage dam shall not begin until the County Engineer, the United States Soil Conservation Service, or a civil engineer registered by the State of California has approved the plans and specifications for the dam. Construction of the dam shall be under the direction of said approving party.
