Good afternoon

I know I'm late on sending this, however I'm hoping that my email will still be considered. I am writing about this matter on behalf of my family who owns property at Lake Copco. For many years since I was younger we have gone to that home and enjoyed the lake whether through fishing or being on the boat. Aside from this, if the dam at Copco lake is taken away, it means the whole lake will dry up and there will only be a small river that's the Klamath river. A lot of fish will die as well as a result and the supply water to people's homes will be affected. The negative consequences far outweigh any positive in this scenario.

Please take this email into consideration and that the Dana family is against removal of the Copco dam.

Thank you,

Sarah Spears
