Subject: Informal Section 7 Consultation for the Temporary Suspension of the Flushing Flow Requirement at the Pit No. 1 Hydroelectric Project (FERC Project No. 2687), Shasta County, California

Dear Mr. Wong:

This letter is in response to your February 6, 2017, letter requesting concurrence with the determination that the temporary suspension of the flushing flow requirement at the Pit No. 1 Hydroelectric Project for 2017 is not likely to adversely affect the federally endangered Shasta crayfish (*Pacifastacus fortis*). Your request was received by the U.S. Fish and Wildlife Service's (Service) Sacramento Field Office on February 6, 2017. This response is provided under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act).

The Service provided a not likely to adversely affect concurrence to the Federal Energy Regulatory Commission (FERC) on May 3, 2010 for temporary suspension of the flushing flows. At the time, it was assumed the suspension of flushing flows would occur in 2010 and 2011. The Pacific Gas and Electric Company, acting as the non-Federal representative for FERC, is proposing to add another year to the temporary suspension of flushing flows to facilitate completion of the California State Water Resources Control Board's California Environmental Quality Act analysis. The Service's concerns regarding the implementation of the flushing flows remain the same. Because the only change to the action is to continue the suspension of flushing flows for 2017, the Service concurs that the action is not likely to adversely affect the federally endangered Shasta crayfish. We base this concurrence on the best available science that has shown the flushing flows create detrimental effects to this species' habitat and potentially create a favorable environment for non-native crayfish. Therefore, unless new information reveals effects of the temporary suspension of flushing flows that may affect federally listed species or critical habitat in a manner not identified to date, or if a new species is listed or critical habitat is designated that may be affected by the proposed action, no further action pursuant to the Act is necessary.

If you have any questions regarding this response, please contact Josh Hull, Recovery Division Chief

(josh_hull@fws.gov) or Rick Kuyper, Sierra Cascades Division Chief (richard_kuyper@fws.gov) at the letterhead address or telephone (916) 414-6742.

Sincerely,

Eric Tattersall
Assistant Field Supervisor
