Division of Water Rights
Water Quality Certification Program*

Dear Mr. Barnes:

We own a home on Lake Almanor and the proposed thermal curtain at Lake Almanor and Butte Valley Reservoir is frightening on several.

Exporting cold water from Lake Almanor downstream will have a deleterious effect on the environment for fish and wildlife as well as humans.

The financial impact goes beyond the cost of the installation and maintenance of the curtain but also the disruption that it also involves.

Any change that degrades Lake Almanor and/or Butte Valley Reservoir will have a significant impact on the financial well being of the Lake Almanor Basin Community.

The proposed thermal curtain is not restorative and should not be implemented. It does not return the river to its past state and we ask you to please abandon the proposal.

*Carl G. Blaha
