Subject: The thermal curtain

I am opposed to the thermal curtain. Taking water from lake almanor to cool the feather river just does not make sense. Lake Almanor is a world class fishery. The feather river is a series of dams and the fishing is not good. I have been staying at Plumas Pines resort for two months of the year for the past 25 years. The fishing has been deteriorating the past few years because of the drought. Take more water and it will be the end for me. I spend close to 15 thousand dollars a year and family and friends another 5 thousand. I will vacation in Oregon in the future. Chester is losing population. Restaurants are closing and resorts are closing. Chester will be a ghost town if the thermal curtain is passed. Save Lake Almanor!! Do not pass the thermal curtain!!
