**Subject:** Draft EIR, PG&E Certification UNFFR Project NO 2105

We are opposed to Alternatives 1 and 2. Our concern is that Alternatives 1 and 2 will have a devastating negative impact on our community, the surrounding communities, the local economy and the environment. We believe that pursuing these Alternatives are unreasonable and reckless. I urge the State Water Board to only consider the PG&E project, as submitted and approved in the Settlement Agreement of April 22, 2004, without the additional release of cold water from Lake Almanor.
