Subject: Lake Almanor Thermal Curtain

ATTENTION: PETER BARNES

My husband, Len Bossio, and I, Kathleen Bossio, cannot *strongly enough* oppose the proposed thermal curtain. I hoped it was, by now, a non-issue. We attended meetings about this, and it was my understanding that Lake Almanor could be absolutely devastated by this project, filling the lake with algae. How profound an effect could it have on the Feather River and trout protection? To take a gorgeous man-made lake, like Lake Almanor, and turn it into, essentially a swamp not fit for swimming, boating, viewing, would be highly reprehensible. I view this as a drastic and harmful solution with one outcome for the Feather River trout industry. It *might* thrive.

It is our strong hope that this proposal will fail, and save Lake Almanor. Amen.

I am sincerely yours, Kathleen Bossio (Please consider this as two emails as it represents the view of my husband too.

Kathleen Louise Bossio
