Subject: Thermal Curtains

Dear Mr. Barnes

As a homeowner at Lake Almanor I wish to strongly object to the installation of the thermal curtains outlined in the draft EIR. I do not see a cost benefit to the destruction of the cold water pool in the lake. Since only 7% of the water in the lake is considered col, the removal of same will result in the loss of our fishing but also severe algae blooms in late summer. Please use your influence to find an alternative solution for the downstream problem

Sincerely, Harley R Bragg, 539 Peninsula Dr. Lake Almanor Ca.
