I'm a single mom living in Chester with my two daughters. I can't imagine not living in Chester. Thou we are a small community we are strong and united when it comes to protecting where we live and those who live here. The Thermal Curtain will not only destroy the use of the lake ,but all the businesses that make there living both at the lake and in town and surrounding communities. My children got the lake itch last year multiply time and in fact had there feet in the water this past weekend and already had signs of itching. I'm not in any position to just pick up and move with two kids. I can make a living here for my children and myself, but if the Thermal project moves forward we will be faced to leave. We moved here to be close to family and its saddens me to think that a group of individuals appointed to a board that clearly know nothing of how this will affect the community are holding are lives in a balance. I doubt any of those individuals have even every been to Chester ,the lake or any of the surrounding communities. I on the other hand have been coming here since I was born. My parents live here and a large portion of my family. I may not have every fact or detail on this project but I do know that PGE doesn't even support it. That alone should be huge red flag. I'm just so frustrated. How does a group of people get the power to destroy communities. They don't even have the correct date to base there findings on. SO what I understand from this Thermal Curtain Project is that **FACTS DON'T MATTER ,THE COMMUNITY AND PEOPLE LIVING IN IT DON'T MATTER AND THAT POSSSIBY SAVING A FEW FISH IN THE FEATHER RIVER ARE WORTH DESTROYING OUR COMMUNITY FOREVER.** Wendy Cheli
