Subject: Lake Almanor

Regarding the Lake Almanor cold water release.

I have a cabin in the Lake Almanor peninsula. This area is, in my opinion the epitome

of beautiful. The lack of common sense in the views of the powers to be, to potential damage to the lake, is unacceptable. The proof of negative consequences in warming water is there. The fact that you need to cool the waters of Feather River is, in itself proof, warm water is detrimental to the water system. So, why is it you are willing to destroy one body of water, to destroy the other? I am strongly opposed to your EIR solution.
