**Subject:** Lake Almanor Thermal Curtain

Mr Barnes,

I understand that there have been a number of vocal members of the Lake Almanor community who have spoken out against the thermal curtain. However I am concerned that perhaps the negative impacts of the project may be getting over exaggerated by the opponents and the positive impacts to the environment ignored. As I understand the thermal curtain would help protect an endangered species which would be otherwise put at risk and I understand this is being considered as a result of environmental studies which advocate such a move. I therefore wish to voice my support. I am aware that this project has been under consideration for a long time and that the water board could certainly not be accused of acting in a hasty manor as there has been plenty of time for public input.

James Day  
Lake Almanor Resident
