Subject: Opposed to Thermal Curtains at Lake Almanor

Importance: High

As a homeowner in the at Lake Almanor I am writing to say I am strongly opposed the construction of the Thermal Curtains. It makes no sense at all to ruin the world class fishery at Lake Almanor that is enjoyed by thousands or people for a questionable attempt to lower the downstream water temperature. The feather river has been just fine for nearly 100 years since the construction of Lake Almanor. The lake is already relatively warm and even a few degrees warmer will cause algae and create irreparable damage. It is ill conceived and a waste of money.

Subject: Opposed to Thermal Curtains at Lake Almanor

Importance: High

Mr. Barnes,

I am resending as I did not get an acknowledgment from my initial email. I will add that the more I have read the EIR and alternatives 1 and 2 the more strong is my opposition. In addition to the negative impact on the fishery, there will be a even more devastating impact on the local community and the local economy. These are hard enough times without this waste of money and negative economic impact. Just leave things as they are. With the low water and warm winter the lake is already green with algae. Let's not make it worse.

Thank-you for listening. – Roger Delight
