Subject: Water Quality Certification Program

Dear Sirs;

I am writing to object to the water board staff recommendation in the draft ERI. exporting most or all of Lake Almanor's cold water pool to achieve a marginal benefit far downstream would be an ecological travesty. I'm sure that there is a much less expensive way to achieve a lower temperature downstream.

This will destroy the fishing in Lake Almanor.

Thank you for your consideration of this matter.

Larry Dick
resident of Lake Almanor.
