**Subject:** Lake Almanor

This email is to inform you that I am opposed to the Water Board staff proposal in the EIR draft.

Negative impact can occur at a time when the public is being bombarded with news on global warming and an extended drought. The state will spend unknown costs on a lake fed by the mountain runoffs to affect WHAT??? - Ruining a lake and harming wildlife and humans. Does anyone know what the long term results will be? And who cares?
