Subject: Save the lake

Please take a clear look then----don't Persue the thermal curtinat at lake almanor. The costs in so many ways would be Phenominal. Tourism, real estate, lower tax base, loss of 1000s of fish in th lake. Just to benefit water temp so a few fish will grow faster. Please plus that area is closedto fishing. The DFG has not found one trout that died from warm water. So help pls. Jim drake
