Subject: Thermal Curtains in Lake Almanor

Sir, please see letter being circulated by concerned Lake Almanor residents. I completely agree with its contents.

I would add that there is no scientific evidence that ANY lower temps in the lower reaches of the river would result! As a retired engineer for the Dept of Defense, I often experienced well meaning environmental proposals that failed to be supported by facts or scientific study. Please do not repeat this poor methodology in the case of this proposal.

Economist Friedrich August von Hayek (1899-1992): "When it becomes dominated by a collectivist creed, democracy will inevitably destroy itself."
