Dear Mr. Barnes,

I am a frequent visitor to Lake Almanor. I understand there is a proposed removal of cold water from Lake Almanor by the installation of a thermal curtain. I am strongly against this proposed project! The removal of water from Lake Almanor would have a negative effect on the health of the lake, the economy of the region and the recreational use of the lake. One of the goals of the relicensing is to not have an unreasonable affect on the water quality of Lake Almanor I have not seen sufficient information that can support the lake will not be severally harmed by the removal of not only cold water from the lake but from the additional release of water during the warm summer months ([June 15<sup>th</sup> through September 15th](#)).

Sincerely,

R. Bret Fidler
